Portland Street Directory

EXPLANATIONS AND ABBREVIATIONS

The system adopted for numbering the streets of this city is, that a person, starting at the beginning of any street, and following along with the numbers, every even number will be on the left hand, and every odd number will be on the right hand.

When no letter is placed after the name it will be understood as indicating the place of residence; fac, factory, h and s, house and store, h and sa, house and saloon, h and sh, house and shop, mfy, manufactory, o, office, s, store, sa, saloon, st, stable; rsnt, restaurant. Where a 0 stands before the name of a street it signifies that there was no number dropped for the space the street occupies. When a — follows the number it signifies that the street ends there.
